REFERENCES FOR PUBLISHED INFORMATION RELATING TO THE GENERAL TOPIC OF 'THE HISTORY OF BLOOD TRANSFUSION' WITH INTERNET LINKS

NOTES:

These references (to published papers / chapters of books) are a personal selection that includes review and general articles on the topic of the 'history of blood transfusion' as well as significant 'milestone publications' relating to the development of blood transfusion during the 21st century. They also include a selection of references for publications written when the transfusion process was in its infancy with regard to knowledge of the ABO blood groups and effective anticoagulation.

The references are listed alphabetically by senior author's surname.

The internet links for published material listed below in **blue** allow free access to the article whilst those in **red** allow access only via an institutional pass, site registration or payment.
